Safety, compliance, and warnings

Safety information

List of SSD security warnings based on General Product Safety Regulation (GPSR) 2023/988 requirements:

* Before installing or disassembling an SSD, make sure your computer is turned off and disconnected from power.

* When installing an SSD, use the appropriate tools and screws to avoid damaging your drive or computer.

* Do not open the SSD enclosure as this may result in loss of warranty and damage to the drive.

* Protect your SSD from moisture, dust, and extreme temperatures.

* Use SSD management software according to the manufacturer's instructions to monitor its health and performance.

* Regularly back up data from your SSD to avoid data loss in the event of a drive failure.

* Do not disassemble the SSD while writing or reading data, this can lead to data loss.
* Do not expose your SSD to shocks, drops, or other mechanical damage.

* Once usage is complete, delete data from the SSD securely to prevent unauthorized access to the data.

* Follow the rules for the safe handling of electronic waste when disposing of an SSD.
